

# CHI DISINFECTING SERVICES

## Disinfecting Fogger Clean UP

During this pandemic, the importance of sanitizing and disinfecting is a must!

As a cleaning professional I would strongly suggest that every commercial facility should be disinfected and sanitized with a Virus or Bacteria sanitizer at least once a month. If you do not have a regular cleaning service, the risk for germs and infectious disease increases by 95%. It is unclear exactly how long COVID-19 can remain on a surface. Early evidence suggests that the virus can survive for several days at room temperature. Therefore, sanitizing commonly touched surfaces helps to prevent the spread of

illnesses like COVID-19 and the flu. We have an eco-friendly germ fogger that eliminates and kills 99% of any virus or bacteria. It is cost effective starting at \$159 and fast. Have your clubhouse or common areas sanitized of infectious disease. The peace of mind knowing your community is disinfected and sanitized is priceless. Safe around kids and pets non harsh or abrasive and eco-friendly.
